

Mido Chair

An architectural design and a personal touch are self-evident characteristics of a contemporary chair. Our sense of comfort, combined with our high-quality finishing and beautiful colour palette strengthen these characteristics even more.

Support

- Metal support with 4 legs.
- The legs are made of a round steel profile (diam. 19 x 2 mm) that is welded to a seat frame.
- The rear legs are bent a little more backwards than the backrest, so that damage to the wall is avoided.
- The chair can be easily stacked.
- All edges and corners are rounded off.
- No visible fastening points.
- The legs are equipped with synthetic glides.

Seat

- Upholstered with fire-retardant foam.
- The opening between the seat and the backrest makes it easier to clean the chair.
- Ergonomically preformed plywood board. Thickness: 10 mm.
- Easy to disassemble, so that the chair can be upholstered again.

Backrest

- Upholstered with fire-retardant foam.
- Ergonomically preformed plywood board. Thickness: 10 mm.
- Easy to disassemble, so that the chair can be upholstered again.

Armrests (for armchair)

- The armrests constitute one unit with the legs.
- The armrests are slightly bent and offer excellent support while getting up or sitting down.

Colours

We would like to refer to our extensive colour gamut.
Sample card + samples available on request.

Dimension

10420 | Mido chair | 51 x 56 x h 82 cm
Safe working load: 110 kg

14896 | Mido armchair | 57 x 56 x h 82 cm
Safe working load: 135 kg
